25X1

1. On 11 December 1951, the Albrochts Kaserne in Korneuburg (P 49/S 30) still 25X1C  
 quartered troops who wore red-bordered black epaulets. The ruins in front of  
 the installation had been removed and a brick wall was erected. Jeep                       
 and trucks                      all driven by soldiers with red-bordered  
 black epaulets, were identified in the billeting area. The road leading to the  
 Soviet office and garage on Hovengasse was blocked by a brick wall which was  
 guarded. Thus, the installation was barred to view from the outside. Sedan  
                     driven by soldiers  
 with red-bordered black epaulets, were seen moving into the billeting area. AA  
 guns in the cantonment on the road to Bismberg included 18 AA guns with funnel-  
 shaped muzzles and 12 AA guns of about 60-mm. The armory on the intersection of  
 Wiener Strasse and Kwizdagasse seemed to be vacant. All motor vehicle sheds there  
 were torn down.
2. On 10 December, about 40 soldiers with red-bordered black epaulets were seen 25X1C  
 training with four AA guns with funnel-shaped muzzles in the Prinz Eugen Kaserne  
 in Stockerau (O 49/S 21). Other troops were drilling. Trucks                       
 and jeep                      all driven by soldiers with red-bordered black epaulets, were  
 identified in the barracks yard. Platoons marched into the Jaeger and Artillerie  
 Kaserne. They wore red-bordered black epaulets. Three majors wearing red-bordered  
 black epaulets with artillery insignia were identified. Other soldiers practiced with  
 a mobile AA range finder.\*
3. On 12 December, two radio trucks, including one with three rod antennae, stood in  
 the park of the Myrtl Orphanage in Moedling (O 49/X 37). About 15 soldiers wearing  
 black-bordered black epaulets were seen at the athletic field behind the orphanage.  
 Small truck                      driven by a soldier with red-bordered black epaulets, was  
 seen in front of the installation. The two garages in the former automobile and  
 aircraft engine factory were separated by a board wall which made it impossible  
 for source to determine whether the armored reconnaissance cars previously ob- 25X1C  
 served, were still there. A new entrance on the southside of the installation was  
 guarded by a sentry who wore red-bordered black epaulets.                       
                     \*\* Officers entering or leaving the former  
 technical college included eight field-grade officers wearing black-bordered red
